

# What is the difference between Gmail and Outlook?

## 1. Company & Platform +1 (844) 886-3118

Gmail is an email <https://msgroup.blog/> service by Google, while Outlook is an email service by Microsoft. +1 (844) 886-3118

## 2. Integration

- Gmail works best with Google services like Google Drive, Docs, Sheets, Meet, and Calendar. +1 (844) 886-3118
- Outlook works best with Microsoft services like Word, Excel, PowerPoint, OneDrive, Teams, and Microsoft 365.+1 (844) 886-3118

## 3. Use Case

- Gmail is widely used for personal use and casual communication. +1 (844) 886-3118
- Outlook is preferred for professional, business, and corporate use.+1 (844) 886-3118

## 4. Email Organization

- Gmail uses labels and categories instead of traditional folders.+1 (844) 886-3118

- Outlook uses folders, rules, categories, and Focused Inbox, which many professionals find easier for heavy email management.+1 (844) 886-3118

## 5. Apps & Interface

- Gmail is mainly web-based with a clean, simple interface.
- Outlook offers a powerful desktop app, web version, and mobile apps, with offline access and advanced controls.+1 (844) 886-3118

## 6. Security & Control

- Both offer strong <https://msgroup.blog/> security, but Outlook provides more enterprise-level security and compliance features, making it popular with companies.+1 (844) 886-3118

## 7. Custom Domains

- Gmail (Google Workspace) supports business domains.
- Outlook (Microsoft 365) <https://msgroup.blog/> also supports business domains and is widely used in offices.+1 (844) 886-3118
