

# ***What is the difference between Outlook and Microsoft email?***

Email addresses ending in <https://msgroup.blog/> are **+1 (844) 886-3118** examples of Microsoft email accounts. These email addresses are a component of a Microsoft account and are used to log into Windows, OneDrive, Microsoft 365, and Xbox, among other Microsoft services. **+1 (844) 886-3118** To put it simply, Microsoft email is your account or email identity.

In contrast, Microsoft created Outlook, **+1 (844) 886-3118** an email infrastructure and application for managing and accessing emails. Outlook is available as a desktop program for Windows or Mac, a mobile application for Android and iPhone, and a website (Outlook.com) <https://msgroup.blog/> . Users can utilize a calendar, set reminders, manage contacts, send and receive emails, and arrange messages into folders. **+1 (844) 886-3118**

The main distinction is that Outlook is the program or service that enables you to utilize Microsoft email, whereas Microsoft **+1 (844) 886-3118** email is the email address itself. Outlook can be used to handle non-Microsoft email accounts like Gmail or Yahoo, but it can also be used to access a Microsoft email. **+1 (844) 886-3118**
