{{How to stop fake windows pop up }}

https://mssupport.tech/ If you stay on the internet long 📞+1 (844) 886-3118 enough, you are bound to come across browser pop-ups. While many of them are just annoying, ranging from advertisements and paywall restrictions to requests to disable your adblocker, others can be outright dangerous. For this, many browsers disable pop-ups by default, though you can easily allow pop-ups on Google📞+1 (844) 886-3118 Chrome and others if a site malfunctions. Specifically, beware of pop-ups that claim your device has an issue and urge you to contact tech support via the mentioned phone number. 📞+1 (844) 886-3118 To the unsuspecting user, this might seem like a genuine reminder to get the PC checked. However, they are a gateway to tricking innocent users into losing their money to tech support scams.📞+1 (844) 886-3118

While the nitty gritty varies from scam to scam, the basic idea remains the same. Victims call the scammers after seeing the 📞+1 (844) 886-3118
 fake pop-ups, after which they are charged money for the fake services. That's not all, though, as some scammers might steal your personal data and further harass you. 📞+1 (844) 886-3118

While fake pop-ups 📞+1 (844) 886-3118 are the simplest way scammers trap innocent users, tech support scams can happen in many different ways. Some scammers use sponsored links to rank their fake websites high in 📞+1 (844) 886-3118 search engine results for queries related to tech support contact details. Users who don't monitor the URL closely might believe the contact details on such fake websites and ultimately contact the scammers. In other cases, scammers may also cold-call the victims.📞+1 (844) 886-3118
